

VWR Collection polystyrene weighing boats

Our flexible polystyrene boats feature smooth surfaces to provide accurate pour-outs with minimal sample loss.

Select white, black, or blue boat for best colour contrast to make sure all sample is removed from boat. Biologically inert and resistant to dilute and weak acids, aqueous solutions, alcohols, and bases. Resist temperatures to 200 °F (93 °C). Pack of 500.

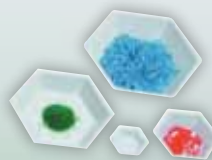

A. Standard weighing boats

These polystyrene boats are shallow with a wide, flat bottom to resist tipping. Rounded corners simplify transfer. May be used with microwave moisture analyzers.

C. Hexagonal weighing boats

Bend flexible boats at points to form pour spouts. Flat bottoms and sloping sides provide accurate transfer. These antistatic, polystyrene boats are non-reactive with most substances.

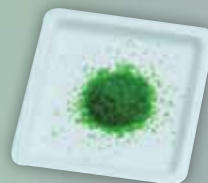

B. Diamond-shaped weighing boats

Feature a diamond shape that easily flexes for accurate pouring and a wide, flat bottom to resist tipping. May be used with microwave moisture analyzers. Antistatic boats available.

D. Square weighing boat

Sturdy polystyrene boats are very shallow with a wide, flat bottom to resist tipping. Ideal for solid product weighing.

E. Pour-boat weighing dishes

Pour spout design easily dispenses samples without flexing the dish. Flat-bottom dishes are made from 12 mil thick polystyrene for better strength, stability, and handling.

Type	Description	Size	Cat. No.
A	Weigh boats, black	7 ml	611-9175
A	Weigh boats, black	100 ml	611-9176
A	Weigh boats, black	250 ml	611-9177
A	Weigh boats, antistatic	7 ml	611-9178
A	Weigh boats, antistatic	100 ml	611-9179
