

## SLIMSETTE™ tissue cassettes from Simport

### M509SL tissue cassettes in QuickLoad™ sleeves

- Transparent sleeve allows viewing of cassettes in case of jams in the printing process
- Efficient flow through slots maximise fluid exchange and ensure proper drainage
- Covers can be snapped off and discarded for embedding
- Large labelling areas on three sides of the cassette with anterior writing area at a 45° angle
- Compatible with Thermo Fisher cassette printers

### M509T SLIMSETTE™ tissue cassettes in QuickLoad™ stacks

- Moulded from special high density acetal polymer to keep specimens safely submerged
- Totally resistant to the solvents used in histology laboratories
- Efficient flow through slots maximise fluid exchange and ensure reagent drainage
- Cover does not protrude above the cassette to save space
- Anterior printing area is at a 45° angle so is easy to see
- One piece disposable plastic cover is pre-installed on each cassette
- Suitable for Leica and Sakura inkjet printers

## Ergonomic high performance pipettes

Precise, accurate and ergonomic

- Significantly reduced plunger forces
- Effortless volume adjustment with volume lock
- Superior accuracy and precision for critical applications
- Tapered shaft and adjustable ejector for universal tip fit
- Extended finger rest for convenient pipetting
- Fully autoclavable

## Control microbial contamination in the air with the MAS 100 Eco®

- Robust, lightweight and easy to handle air sampler – two button operation
- The handle doubles as a stand to allow different angles for testing and an optional tripod adapter attaches to the handle for fixed applications
- Low running costs - uses standard Petri dishes
- Airflow: 100 l/min acc. to ISO 14698
- Isokinetic: No turbulence in laminar flow areas
- Sample volume programmable up to 1000 l
- Runs for 7.5 h with built-in NiMH battery

## Bench protection

Introducing a brand new high absorption grade!

VWR Collection bench protectors are made of an absorbent, impermeable material designed to protect laboratory surfaces against hazardous spills. High quality, smooth absorbent paper that quickly absorbs liquid spills, and a laminated polyethylene layer that prevents seeping onto the working surface.

Absorption (H<sub>2</sub>O):

- Regular bench protection: Approx. 500 ml/m<sup>2</sup>
- Maxi bench protection: Approx. 750 ml/m<sup>2</sup>
